

New, edit, delete

Within a country, the course data of other golf clubs and golf courses can also be downloaded from the intranet! If necessary, always check the handicap distribution supplied for the holes by these other golf clubs, which they also transmit to the intranet!

You can only load the places from your own country (e.g. within Germany) that are available on the intranet.

Germany, Switzerland, Austria

From 2016 - for Germany and Switzerland

In Germany and Switzerland, the new course data may be activated within a 14-day period after receiving the rating. The advantage is that you can close current tournaments with the „old place data“.

After the 14-day deadline, a tournament can only be closed with the new rating!

Load course data from the intranet for 18 and 9 holes ratings

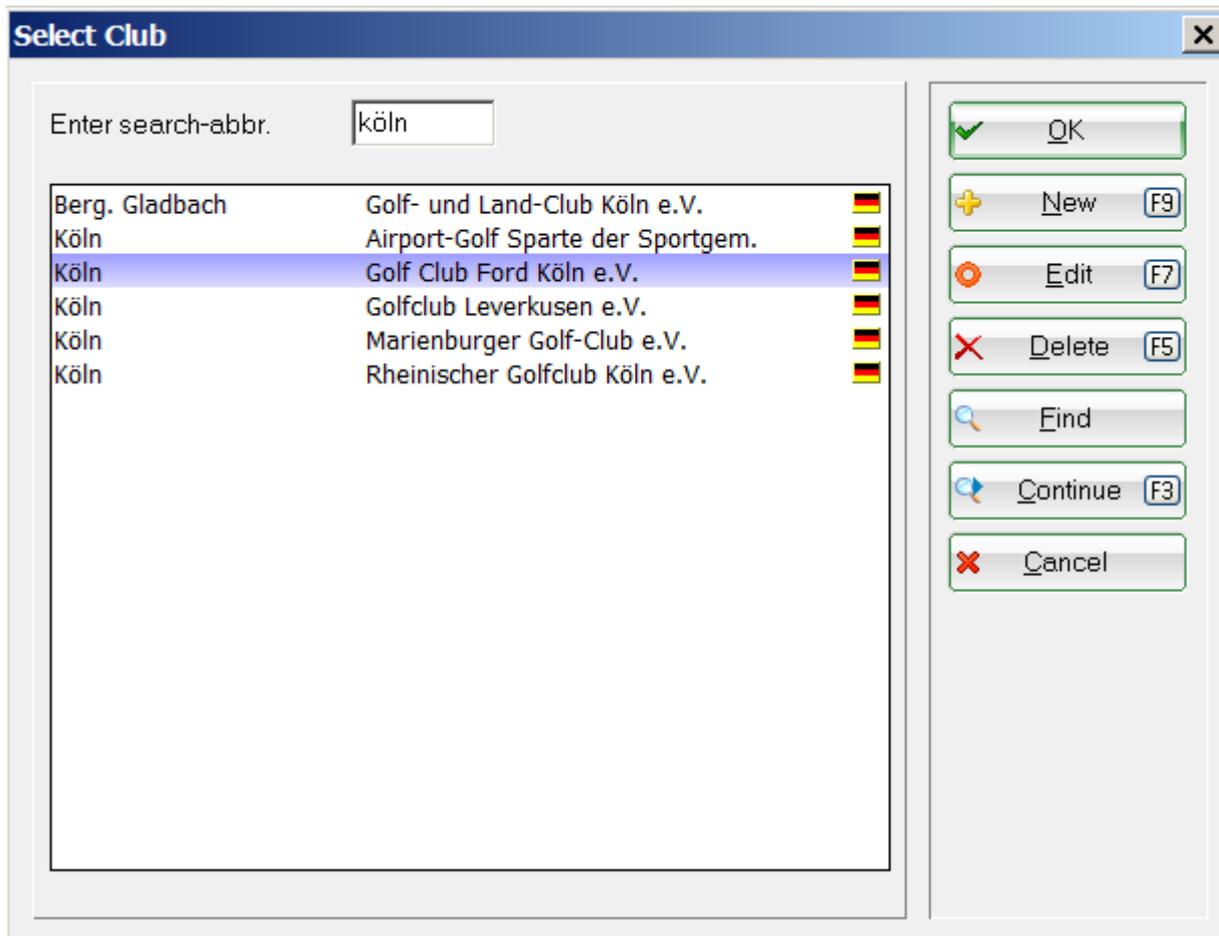

Never change your current location data! This will result in a retroactive effect on past tournaments when you print a list.

Remember: If you are loading course data from the Intranet, you must select again the course in all future tournaments that have already been created. If you don't do that, the old information with the invalid course data remains valid for the entire tournament!

After downloading the course data according to the instructions, please follow [this To Do list](#) so that the new course data is available for all the on-going tournaments.

Follow these steps to change the course information and ratings:

Click on the PC CADDIE menu **Setup/Clubs+Courses/...new/edit/delete**. Enter the club number or club name of your club when it comes to your own new rating. If you want to load data from another club, you can also find it using a key-word search or the ASG, DGV or ÖGV number.

Select the course and confirm with **OK**.

Please verify the course name:

AA 1-9 Golf-Club Fold Köln

Type: 9A

Activate until: 25.10.2016

Enable these CR data now

OK

Cancel

Here you can enter the course name.

Starting with 2016, the new course data may be activated within a 14-day period after receiving the rating. The advantage is that you can close current tournaments with the „old place data“.

The course's name is displayed in the tournament main settings. For example, if the name begins with „Holes 10-18“, you will see this directly in the tournament main mask and you can also quickly see if the right course is set.

Confirm with **OK**.

The course data is now loaded. In this example we loaded the information for the last 9 holes. In the bottom-left corner of the window you can select **second 9 holes** for the new course “Holes 10-18”. Also enter the handicap distribution.

Course information: Golf Club Ford Köln e.V. - 3

Name:

ID: Club: Site: Course:

Version:

Rating 7/8 | Rating 9/10 | Rating 11/12

8.	4	8	17.	4	17
9.	4	9	18.	4	18
Out 36			In 36		
<input type="text" value="second 9 holes"/>			Tot 72		

(F8)

Please keep in mind that you always have to enter the rating for 18 holes, even if the course only has 9. The handicap distribution consists of odd numbers for the first 9 holes (1,3,5,7,9,11,13,15,17), and even numbers for the last 9 (2,4,6,8,10,12,14,16,18).

The handicap distribution should be entered accordingly in the correct way, so that the sequence at 1-9 is the same as at 10-18. (In the example, Hole 1 has the handicap 3, corresponding to the one of Hole 10, as this is the same hole as in the first round, with handicap 4.)

Out	36		In	36	
second 9 holes			Tot 72		

Buttons: OK, Intranet, Copy, Hole names, Target times, Spec: Par/Hcp, Print (F8), Cancel

You can enter individual names for the holes by clicking on the **Hole names** button; the names will be then printed on scorecards, for example Loch Ness, Nice view, etc. If you want to hold a 9-hole tournament on the 10-18 course, you can enter a conversion of the holes. This will allow you to score holes 10-18 on the scorecard, starting with hole 1. This makes it easier for many players to enter the scores. See the following screenshot for a course 10-18:

Special hole numbers and names ✕

Here you can enter special numbers and names you want to print on score cards:

Hole	No.	Name	Hole	No.	Name
1	10		10		
2	11		11		
3	12		12		
4	13		13		
5	14		14		
6	15		15		
7	16		16		
8	17		17		
9	18		18		

Confirm with **OK**.

Your 10-18 holes course is now finished.

Data for foreign clubs

If a player from a country that is not connected to the Intranet participates in a tournament in Germany, you have to manually enter the name and **the zip code in the club data**. Thus, the country code and club name appear on the start list, for example „NL - OP de Niep“!

You can also fill in other fields, in particular if you want to send the results of handicap effective tournament to the home clubs. In this case, you can print the result messages and send them by mail or give them to the player.

Club data for Luxemburg, Hungary, Bulgaria

Players with home clubs from Luxemburg can use the INTRANET (PCCADDIE/ONLINE) synchronization if the player's home club original number is entered. Of course you can fill more fields. Due to the country code, a guest player's handicap can be synchronized, and the player is not marked as „foreign player“ on the start list.

Buttons: OK, Intranet, Copy, Hole names, Target times, **Spec: Par/Hcp**, Print (F8), Cancel

The following window opens:

Different values for Par and Hcp-distribution

On which tee do you want to enter the different values?

- Back standard tees Men
- Back standard tees Ladies
- Middle tees Men
- Middle tees Ladies
- Front standard tees Men
- Front standard tees Ladies
- Front tees Men
- Front tees Ladies
- Junior tees Men
- Junior tees Ladies

Buttons: Quit, Edit special tee details (F7)

You will see no change in the pars at the next tee, compared to the main screen:

Different details for Par and Hcp-Index [X]

Please enter on which holes you have different data for Par and Hcp-Index.

Enter only data different from main-course and leave the other data fields empty!

Hole	Par	Hcp	Hole	Par	Hcp
1		4	10		8
2		7	11		17
3		13	12		11
4		16	13		3
5		1	14		6
6		10	15		9
7		2	16		12
8		5	17		15
9		14	18		18

OK

Cancel

You can see here if the par values changed due to lesser or greater distances compared to the main mask, and you can manually enter a different handicap distribution for individual tees.

Are the new ratings loaded?

These points are to be considered and eventually completed:

- Make sure the new course data is used for future tournaments!
- Remember the [target times](#) for the new course!
- Don't forget about the holes conversion for a 9-holes course (for 10-18: clarified in the section about loading the course data!)
- Print your [BAGTAGS in A4-format with the scorecards](#)? Modify the course data accordingly for allowing this printing!
- Are you using the PC CADDIE timetable? Enter the new [course in the timetable area](#)!
- Updating the new course using the club manager gives you access to the [Online scorecard calculator](#)!
- Print the new [Course-Rating table](#)!

Not handicap effective course

General information

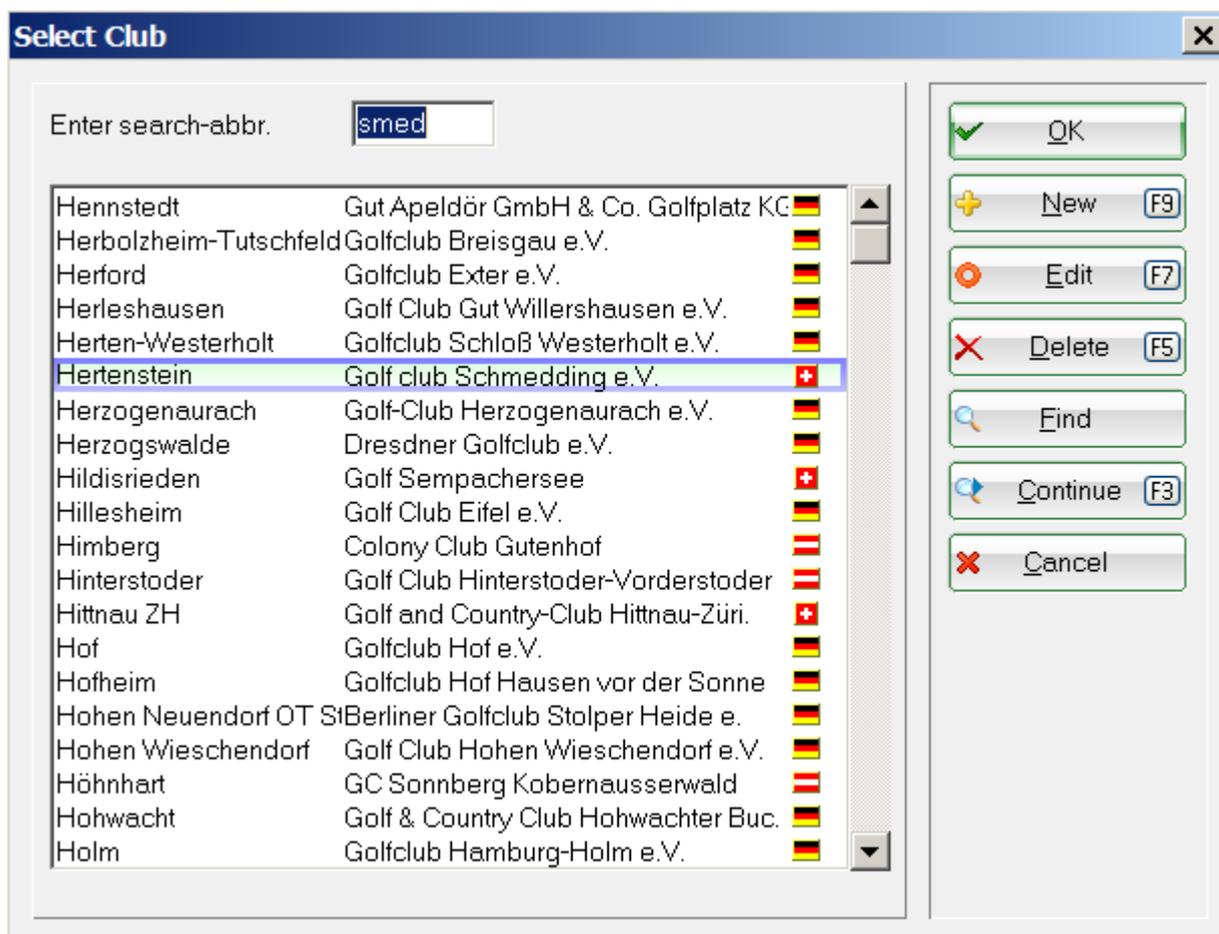

- Naturally, you also have the possibility of creating not handicap effective courses, for example for a cross-country or a putt tournament.
- Enter Slope, CR, Par and the corresponding handicap distribution for such a course, so that

PC CADDIE can calculate an appropriate handicap.

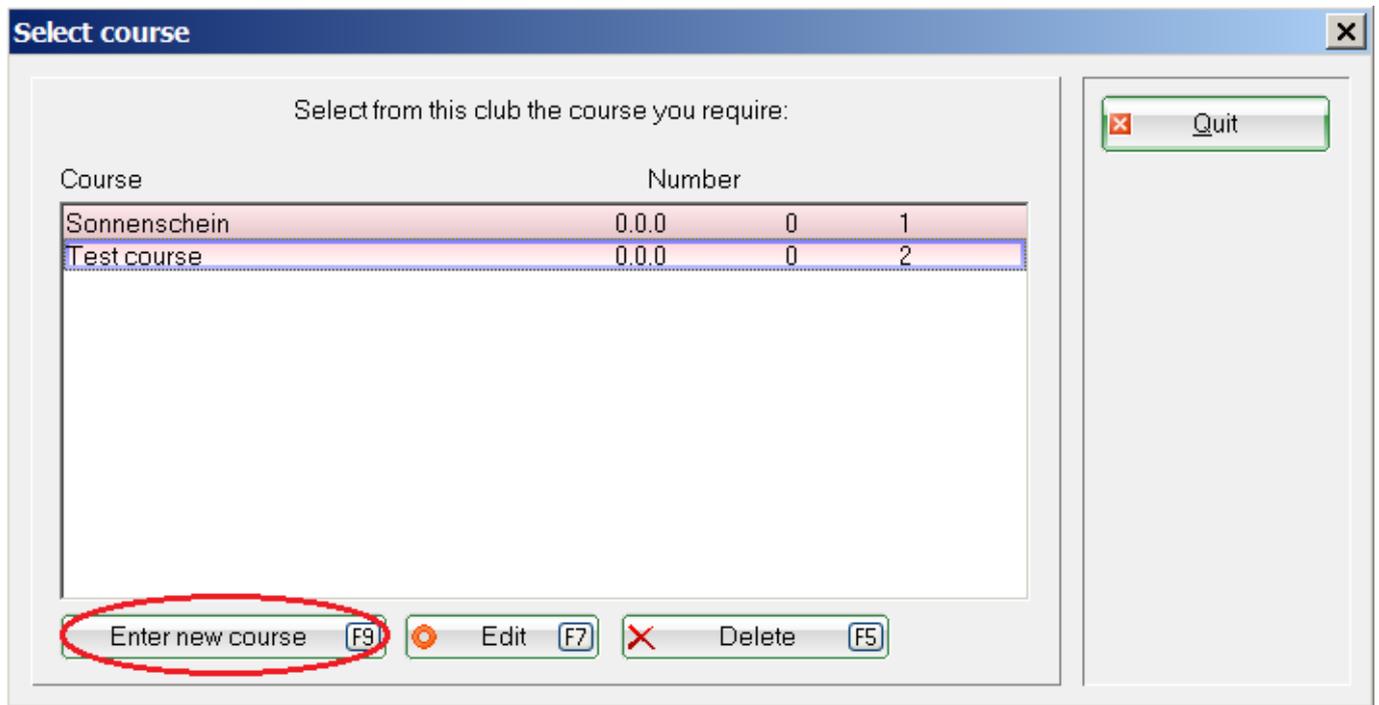

- HINT: To ensure that the handicap is mathematically rounded (for an un-rated course), enter 113 for Slope and the par values for CR.
- Read more on this topic [Game and playing handicap for tournaments over less than 18 holes](#).

Manually enter a course

Follow these steps for entering a new course: click on the PC CADDIE menu **Setup/Clubs + Courses/...new/edit/delete**. Enter the search abbreviation for a course or the club number.

Select the course and confirm with **OK**. The button **Enter course details** provides an overview of the courses already entered for that club. Press **Enter new course (F9)** to enter a new course.

This will bring you to the overview window of the new location:

1. Use a relevant name for the course.
2. Add the par or difficulties according to the specifications.
3. Defining whether it is an 18-hole or a 9-hole course is unnecessary for a course not loaded by the golf association (no rating from the association)! This can only be 18 holes, as the difference is only checked with a handicap-effective competition!

Now enter the respective lengths in the corresponding tabs.

Example course for a 12-holes tournament

This would be an ideal solution for a cross-country competition!

Slope = 113, CR = Par (here 69)

The most important thing here is the handicap distribution. Since by default the handicap is always calculated for 18 holes, make sure that the handicaps 3,6,9,12,15,18 are entered on the holes, since in a 12-holes tournament the holes 13 to 18 are not played. This course is also suitable for 6 hole tournaments, as the handicap allocation for the holes 1 to 6 is 1,4,7,10,13,16.

I.e., 1 (1. one-third), 2 (2. one-third), 3 (3. one-third of the holes), 4 (1. one-third), 5 (2. one-third), 6 (3. one-third), and so on...
