Import all record sheets from golf.at

In Austria, all record sheets are managed by golf.at. The record sheets can be downloaded to PC CADDIE via **Handicaps/Import all record sheets from golf.at**. This function serves the following purposes:

- Evaluations with PC CADDIE such as the Rookie of the year
- Printing the handicap record sheet for a member
- Current handicaps of members on printouts such as lists of persons

The same function can also be found under Record sheet of each customer.
