Management Report

The PC CADDIE Management Report serves as a **central planning and overview tool** of a golf course. Every day, the report shows the turnover results of the profit centres as well as the utilisation evaluations of the courses and resources, membership trends and

statistical developments. The results are displayed in comparison with the previous year and the planned budget. The management report is displayed daily for authorised users; the report can also be sent automatically to operators and managers by email. The graphical presentation of the data aims to enable those responsible for a golf course to check the economic status of their facility at a glance. The system's individual statistics are also available for detailed analyses.

Costs: The Management Report is available to all PC CADDIE customers free of charge. For more detailed analyses, PC CADDIE provides a PRO version of the report, which allows more in-depth analyses and comparisons. The differences between the two versions can be found below.

			Contraction of the

		_				_

Data protection: No personal data from the golf courses is sent or used for the preparation of the management report data. In addition, the required data is encrypted and anonymised in such a way that PC CADDIE and its employees cannot assign data or results to individual golf courses at any time.

Initial setup of the management report

When the management report is set up for the first time, the following data is requested in order to enable statistical comparability: Legal form, year of opening, number of holes, location, hotel, practice facilities, restaurant, pro shop

Initial set-up

Under the menu item **System Contacts** you will find the menu item **Management Report**.

The configuration is complete.

The configuration

Once the initial setup has been completed, the following window opens:

🗠 Management Rep	ort		- ×
Bereich A von	01.01.2016 bis nieren (anstelle Vorjahr)	31.12.2016	 Q Anzeigen ∽ Letzte Ans.
Bereich B von	bis		Konfigurieren
▶ Q1 ▶ Q2 ▶ Jahr	▶ Q3	▶ Q4	⊡ <u>E</u> nde

In order to obtain an optimal evaluation, a corresponding configuration is necessary. You can find this under the button *Configure*.

In the configuration, you define the sales and the golf courses. We start with the sales:

🗠 Management Re	port - Konfiguration	$-\Box \times$
Umsätze: Driving Range/Pro Bistro	Driving Range Gastronomie	C Indizierung
Name Gruppe Warengruppe	Driving Range/Pro DRRA Driving Range 2 UMSATZ:DR;UMSATZ:PRO;UMSATZ:TEST	×
+ Neu 1 Golfplätze: 18 Loch 9 Loch	RAST 0901	
+ Neu	Bearbeiten F7 Töschen	Ende

1. define your category.

2. the following groups are available for selection: Membership fees, Green fee, Drving range, Proshop, Catering, Hotel, Other. To ensure that the management report is as complete as possible, all existing product groups should be integrated into one group. If a product group has been forgotten or not selected, this turnover is displayed in the Other column.

3. with the help of the list button list button to select the desired merchandise categories. The account area is displayed first, followed by the merchandise category (here in the example SALES = account area, DR; PRO = merchandise category)

Here is an example of a sales configuration:

🗠 Management Repo	rt - Konfiguration		– 🗆 ×
Umsätze:			C Indizierung
Driving Range/Pro	Driving Range	^	~ -
Bistro	Gastronomie		Konfiguration
gastro	Gastronomie		I.I. Prüfen
Greenfee	Greenfee		IIII Hoten

	Koordinaten laden							

1. select timetable area

2. enter the playability

3. "Earliest first tee time": even if the sun rises earlier, the start times only start from the value entered (e.g. due to the opening times of the course) "Latest first tee time": even if the sun rises later, the start time starts from the value entered (i.e. still in the dark for early players)

4. "Earliest last tee time": even if the sun sets earlier, the start times start from the value entered (e.g. if the game is still permitted in the dark) "Latest last tee time": even if the sun sets later, the last start time is possible up to the value entered (e.g. due to the opening times of the course)

- 5. general playing time for an 18-hole round of golf
- 6. enter the number of people per flight
- 7. starting grid
- 8. enter the address, then load the corresponding coordinates

With **OK** to end the configuration.

Creating the management report

🗠 Managem	ent Repo	ort		- ×
1 Bereich A	von	01.01.2016 bis	31.12.2016	4 Q Anzeigen
Bereich B	von	eren (anstelle vorjanr)		Konfigurieren
3 Q1 Jahr	▶ Q2	▶ Q3	▶ Q4	⊡ <u>E</u> nde

1. area A: Please select your desired time range.

- 2. area B: If the comparison period should not correspond to the previous year, change the data here.
- 3. Q1 corresponds to the 1st quarter, Q2 the 2nd quarter, Q3 the 3rd quarter, Q4 the 4th quarter
- 4. by clicking on **Show** the analysis is generated for the selected period.

The management report analyses 4 areas

The management report analyses 4 general areas:

- 1. the <u>turnover</u> for annual fees, other fees, green fees, driving range, sports operations and other.
- 2. the <u>rounds of golf</u> divided into online and local bookings depending on members / green fees / tournaments
- 3. the <u>course utilisation</u> depending on playable days, available tee times and the general utilisation rate
- 4. your <u>members</u>Number of new members, departures, age structure and the breakdown of men and women

Please note the legend in each case:

PC CADDIE - Management Report

Zeitraum A Zeitraum B Bereich A: 01.01.16 - 31.12.16 Bereich B: 01.01.15 - 31.12.15

- orange bar = current values period A
- grey bar = Values period B (possibly previous year)

The management report only shows the current and previous year as a comparison. It is not possible to create the management report for 2-3 years in the past. The members are calculated for 4 years in the past.

Umsatz Gastronomie Mitaliedsbeiträge Greenfee Driving Range Proshop Hote Sonstiges 1.500.000 1.500.000 1.500.000 1.500.000 1.500.000 1.500.000 1.500.000 1.000.000 1.000.000 1.000.000 1.000.000 1.000.000 1.000.000 1.000.000 500.000 500.000 500.000 500.000 500.000 500.000 500.000 . 1. turnover

In this chart you can see the net turnover in the corresponding areas of membership fees, green fees, driving range, pro shop, catering, hotel and other for the selected period. You define the product groups in these analysis areas in the general configuration.

The lower bar can be moved to open the respective detailed information (for the Management Report Profi version):

The calculation of sales is possible for the current and last year. It is not possible to display previous years.

In order to obtain the comparative figures for the last year as well, it is necessary that the archive areas are ticked accordingly in the configuration. If the archive areas have not been archived accurately, i.e. the 2020 sales are in a 2020 archive area and the 2020 sales are also in the current 2021 area, then double sales figures are generated.

2. the golf rounds

A total of 96 rounds of golf were played in the relevant period, 10 of which were played by **members** and 86 by **green fee guests**. 16 bookings were made **online** and 80 bookings **local** were made. No

tournament rounds were played. These are counted automatically when a tournament takes place.

This number of rounds of golf is distributed over your respective golf courses. The following detailed view shows the number of rounds per golf course created in the timetable. You can again recognise the rounds of members, guests and tournament rounds. The tournament rounds are counted from the respective tournaments in the competitions. If the tournaments have been imported into the timetable, they are ignored here.

In the configuration of the management report, the duration of a round per time table area is configured and not the number of holes. The utilisation is also calculated from this.

With the help of the button *Show / hide details* you can activate or deactivate this view.

3. space utilisation

The left-hand diagram in the space utilisation shows the times and days of the week. In our example, there were 9 people on the pitch between 9 and 10 a.m. on Saturday.

Here is an example:

Clicking on the day of the week changes the way the numbers are displayed (for better readability). The colour of the circles changes depending on the number of players: less than 7 players = orange circles, between 7 and 18 players = yellow circles, more than 18 players = green circles.

From a management report of more than 7 days, average values are given for court utilisation. Timetable suspensions are not counted in the court utilisation.

4. the members

The number of members is always calculated up to the print date (no future calculations). The management report shows the number of additions and departures up to the end date of the period (e.g. 31 December 2016).

This means: if you select a period from 1 January 2016 to 12 January 2016, for example, the entries are counted but no departures (no future calculations). Only with a period from 01/01/2016 to 31/12/2016 will you receive information on entries AND departures.

If you click on the respective coloured circles in the diagram on the right, you can see the numbers of members, men and women, juniors and seniors who have joined or left the club.

In the last three pie charts, you can see the distribution of playing rights, types of persons (individuals and organisations) and age distribution.

Indexing

In the configuration you will find the button **Continue** If necessary, you can recalculate the corresponding areas of the management report here:

⊵	In	dizierung	×
	•	Umsatz	
	۲	Turniere	
	۲	Mitglieder	
	۲	Timetable	
	•	Alles	
	•	Datenbank reorganisieren
