People pictures

With the PC CADDIE module *personal pictures* it is possible to store a photo in the customer mask for each person in the customer mask.

After installing the module, you will receive a customised look in the person mask:

Nome	ng, Benedikt

List printing with integrated personal images

TIP To make it easier to recognise your members, it is possible to print a list of people with the corresponding pictures:

Liste mit Bildern - 17.02.11

Bilderauswahl

		Stand: 17.02.11, 15:42 Uhr
Nr.	Nachname, Vorname	
1	Arens, Anja	
2	Hodel, Carmela	
3	Matthys, Sandra	
4	Ollendorff, Yannick	
5	Quickert, Rosemarie	
6	Richter, Heike	
7	Schantl, Bernadette	
8	Schrader, Susanne	
9	Stökle, Stefanie	

PC CADDIE 2010 © 1988-2008 Schmedding Software Systeme GmbH

GC Sonnenschein, Aachen

To print such a list of persons, please create a list of persons via **Persons/List of persons** to create a new Layout. Click on the button **Edit**

Personen-Liste	—
Layout Liste mit Bildern Editieren Mitgliedsmerkmale Personen-Stammdaten Salden Statstik Statstik Definieren Alle Mitglieder Definieren Reihenfolge Von-Bis Alphabet (Namen) Bearbeiten	Drucken F8 Letzte Ausgabe: 9 Personen Internet Vermerken

to open the editor window. Please create a new layout here with the following information:

<KOPFINFO:FILTER>

```
<Z > | <NACHNAME, VORNAME > | <EXE:PrntBild({150, PrntPosY()-PrntStepY(), 0, 16}, PersBild([FILE]))>
```

You can adjust the lines visible in the image as required. This installs the distance to the next image. You should try to save all images in the same size so that images of different sizes are not displayed, as shown in the list.

Further information on creating lists of people can be found here: List of persons

Form printing with integrated pictures of people

Another variant is a form printout, e.g. of personal data. Here, too, you can integrate the clicks to integrate the photo saved in PC CADDIE into the layout:

To do this, open the desired person and click on the **Print** button to open the selection window button:

Person: Ollendorff, `	Yannick	×

In the selection window, select the template **Person master data** in the selection window and then click click on **Edit**

The editor window opens in which you can add the contents of your form with one of the following two fields fields below:

• <EXE:PrntBild({150, 20, 0, 30}, PersBild([FILE]))>

With this variant, the photo would be printed in the position 150 mm from the left and 20 mm from the top. Here, however, with a fixed width of 30 mm. In this example, the height is automatically adjusted by PC CADDIE.

• <EXE:PrntBild({150, 20, 16, 0}, PersBild([FILE]))>

This field causes the photo to be printed at the position 150 mm from the left and 20 mm from the top - with an automatically calculated width (\Rightarrow 0) and a height of 16 mm.

One of the last two numerical values in the brackets should always be set to ",0",(\Rightarrow automatic adjustment) as otherwise the images would be distorted.

People images parameters

Installation Network Camera/ IP Cam

Hardware recommendation:

- WLAN day & night HD network camera Edimax IC-3140W Link to manufacturer https://www.edimax.com/edimax/merchandise/merchandise_detail/data/edimax/de/home_netwo rk_cameras_indoor_fixed/ic-3140w/
- Basically, all IP cams work where an image can be accessed via a URL

Installation IP-Cam:

Open any person and click on the image/placeholder in the person mask.

Additional info				

To integrate a network camera into PCCADDIE, enter the link in the "Camera image URL" field via which you want to retrieve the images. In this example with an Edimax IP cam, it is the IP followed by an /image.jpg (you can find the exact links that can be used to retrieve an image via search engines on the Internet or on the manufacturer's website for your camera).

If login data is still required by the camera, there is the option of configuring the user name and password in separate fields - these are then automatically inserted correctly in the URL for the usual HTTP login.

Picture parameter	×
Activate display	V QK
Target location camera software for new pidures: D/PCCADDIE/USER_1/PICTURES/ PC CADDIE directory for pidures: D/PCCADDIE/PICTURES/ Extension: *JPG Start-Command for camera software:	Cancel
