Form letters with PC CADDIE

Go to **Persons/Print.../Forms** to create your form letters. This feature is the basis for **Write form letters with Word.**

Find out more details about Form letters with WORD.

The form letter feature in PC CADDIE can be used for writing invoices. For normal letters (for example, newsletters) we recommend to write your text with programs like Word (Microsoft) or other similar text editing programs, as there are more layout and design possibilities. You can then easily use the addresses you have saved in PC CADDIE (see Export addresses for more details).
