

Annual Update Switzerland 2022

Frozen Handicap

According to the WHS, one can freeze the Hcp index (until a certain fixed date). If you select a „frozen status“ and leave the date blank, the date will automatically be dated „in one year“.

Basically, the „frozen“ status should freeze the Hcp completely - „frozen up“ preventing a further increase „frozen down“ preventing the Hcp from decreasing.

For further information on the application and consequences, please contact Swiss Golf. PC CADDIE only transmits the status to Swiss Golf and has no influence on the calculation itself!
