

# Hardware recommendations (Printer, Scanner, Webcam)

## Printer

Finding the right printer for printing bag tags, score cards, coupons and daily mail is a complex task because of the different paper thickness, formats and resolution needs; there is a plethora of choices.

The following are recommendations of printers with which we had good experiences. The recommendations are by no means exhaustive. Regardless of your choice, we will set up your desired printer in PC CADDIE; this will take about 30-45 minutes and we charge it according to our [Service price list](#).

We are also happy to send the printer via our delivery service - please call us for a quote, or send us an email to [vertrieb@pccaddie.com](mailto:vertrieb@pccaddie.com).
