Leaderboard

The Leaderboard is a chargeable PC CADDIE add-on module and is used to display results from current tournaments on an external projection screen. You will find this function under *Tournaments/Leaderboard.* You can make all the settings for the leaderboard there:

Leaderboard	×
Soll das Leaderboard im offenen oder gesperrten Modus gestartet werden?	
VORSICHT: Im gesperrten Modus kann das Leaderboard nur mit der Tastenfolge <+>, <#>, <-> beendet werden (Merken!!).	
Offener Modus (Im Fenster, Ende mit <esc>)</esc>	
Im Zusatzbildschirm	
Gesperrter Modus, <u>D</u> rucken mit <f9></f9>	
Gesperrter Modus ohne Drucken	
X Abbruch	

When started, the leaderboard looks like this:

ń,	Test-Clubmeisterscha	aft 2 09	10.0	8.2022	: - 1	I. Rui	nde					
1	Mustermann, Hans (18,2)	1. Tee, 10:00	536 3	4 8 3 2 6	40	4 5 5 4	464	43	39	79	79	+6,3
2	Musterfrau, Johanna (20,3)	1. Tee, 10:00	6246	55445	41	446	554	64	40	81	81	+9,5
											-	
											-	
			-									
								-		-		
								_				
							-					
			-	-			-	-		-		
							-					

Show tournament on leaderboard

First select the tournament you want to display on the leaderboard. To do this, first select the function *Enter competitions/results* function for the desired tournament and click on the *Leader* (F11):

	2/2		muha		→	• •	Musterm	iann, H	ans (r	muha)							18,2 /	21	. =
Musterfrau, Johanna		20,3	81	60	mujo	~													1. Runde
Mustermann, Hans		18,2	79	58	muha	\checkmark	Ergebni	s-Typ		Loci	hergebr	nisse						T	
							Loch	Par	HV	Score	Bru	Net	Loch	Par	HV S	Score	Bru	Net	
							1.	5	//	5	5	3	10.	3	//	4	4	2	✓ Ändern
							2.	3	//	3	3	1	11.	4	/	5	5	4) R <u>ü</u> ckgä
							3.	4	/	6	6	5	12.	4	/	5	5	4	Leamw
							4.	4	/	3	3	2	13.	5	/	4	4	3	TIT Reset
							5.	4	/	4	4	3	14.	4	/	4	4	3	Derr-Fr
							6.	4	/	8	8	7	15.	5	/	6	6	5	
							7.	4	/	3	3	2	16.	3	/	4	4	3	Drucke
							8.	3	/	2	2	1	17.	4	/	4	4	3	Vorlese
							9.	5	1	6	6	5	18.	4	1	3	3	2	> Nächst
							Out	36	11	40	40	29	In	36	10	39	39	29	Leader
							129/72	.7					Tot	72	21	79	79	58	
							.0 Stra	fschläd	e / St	echen				Rechne	n / Sta	atus			

Now click in the small leaderboard control window Initialisieren:

Leaderboard initi	alisieren			\times
>>Te Soll das Le	est-Clubmeisterschaft 2.<< eaderboard initialisiert werden	?	✓ <u>O</u> K X <u>A</u> bbruch	
Runde:	1. Runde	•		
Gesamt:	Gesamt-Auswertung			
	Spieler aller Runden			
	Runden-Priorität			
Startzeit:	1. Runde	•		
Spezieller Turnierna	me (Leerlassen => Automatik):			
Leaderboard-Typ:	Nur Windows (schneller)	•		

• Determine from which *round* the results are to be displayed.

- From the 2nd round onwards, make sure that the **Overall evaluation** is activated.
- The field **Special tournament name** field can generally be left blank, in which case the normal tournament name is automatically written above the leaderboard. If you only enter a dot (.) here, the tournament name is omitted completely and you can integrate it individually in the background image (as "LBMAIN.BMP", the name can vary, saved in the PC CADDIE main directory in the Leaderboard folder). The **Leaderboard type** should be set to "Windows only" as this type works faster.

Check basic settings

To do this, click on the button Parameter:

occaddie, 10, F1, 15, Ibmeisterschaft 2.	Pd, 15, Pd,	15,F11:nespress,10	,F2,15,P	1.0%

Macro

The macro in the leaderboard represents the actual sequence of the leaderboard display. In the field **Macro**, field, separated by a comma, or define it using the button **Define leaderboard sequence** (F7). The following abbreviations apply:

N	If the first letter is an "N", the macro is not executed. <u>not</u> executed. The letter switches off the automatic scrolling function.
U	Up stands for Up arrow
D	Down stands for Down arrow
PU or PGUP	Page up = Page up
PD or PGDN	Page down = Page down
Н	Home, Pos1
END	End, End
F1	F1 etc.
"F11:bildname"	Displays the image from the "BILDNAME.BMP" file. You can also enter complete paths here to specify the image exactly. Normally, however, the image should be located in the "\PCCADDIE\LEADER" directory, in which case no path name is required.

You can enter a waiting time (in seconds) between each key command. If no time is entered between two commands, the last wait time is simply repeated.

Example of a macro

Here is an example: 15, F11:pccaddie, 9, F1, 9, PD, 9, F2, 9, PD

15 seconds after the last key is pressed, the "PCCADDIE.BMP" image is displayed for 9 seconds. The list is then displayed under key **F1** and immediately jumps to the beginning of the list. After 9 seconds, players 7 to 14 are displayed. Another 9 seconds later, list **F2** is displayed, immediately jumps to the beginning and scrolls on again after another 9 seconds. The sequence then starts again from the beginning.

Set leaderboard sequence

However, you can also conveniently change the sequence using the **Set leaderboard sequence**:

.eaderboard-Ablauf		
Funktion	Wartezeit	🗸 ок
Bild: pccaddie	10	• 1
Preisklasse 1	15	X Abbruch
Bild: nespress	10	
Preisklasse 2	15	
Bild: pccaddie	10	
Preisklasse 5	15	
Bild: nespress	10	
Preisklasse 6 - alphabetisch	15	
Preisklasse 1 - alphabetisch	15	
+ <u>N</u> eu F9 ∕ Ändern F7	Ⅲ L <u>ö</u> schen F5	
Wartezeit vor dem Makro-Start:	10 Sekunden	
Zeitraffa-Faktor zum Testen:	1	

Organise or add to the individual elements as you wish and define the time sequences directly in the element selection. You can also edit your price evaluation for the individual evaluation.

Ablauf de	finieren	
	Bitte bestimmen Sie hier das Ablauf-Element:	√ <u>о</u> к
Element:		Abbaich
F6	Preisklasse 6 - alphabetisch	▲ Populati
F7	Preisklasse 1 - alphabetisch	
F8	Brutto - nach Zeit	
PDE	ans Ende blättern	1
PD	eine Seite weiter	
PU	eine Seite zurueck	
н	an den Anfang	
E	ans Ende	
F11:	Bild:	1
Bild-Date	ic	
C:\PCCA	DDIE\LEADER\pccaddie	
Wartezeit	: 10 Sekunden	

Once the process is complete, confirm your entries with **OK** or Enter.

- In the field *Title* field contains the heading, which can be customised here. If it contains "<A>", it is customised automatically.
- 2. Behind *image* is the file that is displayed as the background (usually LB_VERL).
- 3. With the option **Leading players always** option, you can choose whether the leading players should always be displayed. Then, for example, the first two players always remain on the leaderboard and only the following players scroll through.
- 4. **Time, Anfrage-Pause:** This is how many seconds the leaderboard waits from request to request to check whether there have been any changes in the central computer. **Request pause** can be described as the reaction time of the leaderboard to changes.
- 5. *Time, Aktuell-Timeout:* If the time difference between the leaderboard and server computer exceeds this value (in seconds), the leaderboard is considered inactive.
- Automatic Aktualisierung: If a result has been changed X times, the leaderboard is automatically updated (like *Refresh*). Enter a "3" or "4" here (depending on the usual game size).
- 7. **F1 to F8:** The exact list type to be displayed when the respective button is pressed can be determined here by means of a letter code.

List sorting and display

P01 Classification according to 1st price indication in the price evaluation
--

Ρ	
@TEAMNE	Net team classification
@TEAMBR	Gross team classification
P15	Classification according to 15th price indication in the price evaluation
BU	Gross difference
BS	Gross total
NU	Net difference
NS	Net total
A (additional)	Alphabetical order (e.g.: ABS = alphabetical gross totals)
C (additional)	Sorting by clubs (e.g.: CBS)

Gender separation

Μ	male, only men
W	female, ladies only

Handicap classes

H0-18 Handicaps from 0 to 18, analogue for other numbers

Here is an example for better understanding: **F1: NSMH0-20** F1 = Net totals, men, HCP 0 to 20.

Background image

The files for the background of the leaderboard can be found in the LEADER subdirectory of the PC CADDIE main directory on the server. Please do not change them yourself - if you have any change requests, please contact us.
