Export tournament

Export to PC CADDIE Server

- For this, the exporting golf club and the importing golf club need PC CADDIE.
- You can also export cross-national tournaments here, just make sure you enter the correct club numbers with the country code first, e.g. 043 for Austria, 041 for Switzerland and 049 for Germany.

Click on *Export competitions/tournament* and select the tournament to be exported for another club that also works with PC CADDIE. You will then immediately see the 2nd upcoming screenshot.

Or: You take the path via *Players/create new, process, delete*then select the tournament and then click on the button *Internet*.

Click on the button *Export* button also takes you to the next window:

Export Competition		×
Us of this con the in Computed <u>r</u> ound:	e this function to save all data apetition on a data medium to transfer aformation to another computer. 1. Round and all <u>previous</u> rounds	<u> <u> Competition</u> <u> Export</u> <u> Quit</u> </u>
<u>T</u> arget directory: <u>S</u> ingle file:	C:\ 15048310 FTP upload FTP parameter F7	
<u>С</u> ору:	save names only	
Provide for the: and display to	these clubs:	
C Activate blocki	ng of local Intranet upload	

Tick the box "Automatically provide for these clubs" and enter the club number and country code in the field. If you do not know the club number, please use the list button on the right, via SEARCH you can easily find the club and tick it!

For "Copy", the setting "Save names only" usually works, but you can also export the mobile phone numbers (please clarify data protection, only possible from PC CADDIE to PC CADDIE) so that the recipient club can send the start times by SMS, for example.

With this option, however, the recipient will only import mobile numbers for those persons who have an empty mobile number field in the person mask.

Changes to the mobile numbers are not made during import because it is not possible to know where the customer last entered the current mobile number.

Also tick the box for **Activate blocking of the local intranet** if you do not want to transfer the tournament to the intranet now. This would be important if you transfer different round settings here than previously to the intranet.

Click on **Output**, as soon as you have made these settings and start the tournament export. If everything went well, this window will appear:

Transfer	×
The transfer was completed as follows:	
Upload successful!	
<u>о</u> к	

The tournament has been successfully transferred to the PC CADDIE server, from where the recipient can import it: Import tournament

Export to intranet

- In this case, the exporting club has a different club administration programme.
- There is no international interface, the function can only be used within Germany or Switzerland, i.e. both clubs, sender and recipient must be in the same country.

Open the competition with *Create, edit, delete competition/tournament* and click on the button *Internet.*

Please also provide the DGV ID of the tournament to the recipient club (DGV data protection reasons) so that they can load the tournament from the intranet. If the tournament does not yet have an ID, please click on **OK** and start the intranet synchronisation. This will request a DGV ID from the intranet.

Please activate both the start list and the results list for transfer to the intranet so that the importing club can load everything it needs.

It is also particularly important that you **transfer both the start list and the results list to the intranet again**after you have activated the export to another club. If the export was already set at the beginning of the tournament, everything will be available for the receiving club with the normal processing.

Continue with **Export** (2)

Tick the box next to **automatically for these clubs** and enter the club number of the recipient club, e.g.: 1234 (for multiple clubs separate with ;, e.g.: 1234;8765)

Export Competition		X
Us of this con the in Computed <u>r</u> ound:	e this function to save all data npetition on a data medium to transfer nformation to another computer. 1. Round and all previous rounds	<u> <u> </u> </u>
<u>T</u> arget directory: <u>S</u> ingle file:	C:\ 20004 FTP upload FTP parameter F7	
<u>С</u> ору:	save names only	
Provide for the: and display to	se clubs automatically: 9001 ; 0497737 these clubs:	
C Activate blocki	ng of local Intranet upload	

Then click again on **OK** again and then start the intranet synchronisation. The tournament is now ready for the recipient to pick up on the intranet.

The recipient with the other club management software should be aware that the price classification must be recreated after the import, and the course data must also be loaded separately from the intranet.

Export as tournament file

This function was often used to export tournament files by e-mail to other PC CADDIE clubs before it was possible to export tournaments to the PC CADDIE server and import them from there. Tournament files can only be imported by other PC CADDIE users. It still makes sense, for example, if there is no Internet available and you need the file on a USB stick.

Take the path *Export competitions/tournament* and select the tournament. You will see the following screen:

Export competition: PC CADDIE Cup, 25.03.20	×
Use this function to save all data of this competition on a data medium to transfer the information to another computer. Computed <u>r</u> ound: 1. Round • and all previous rounds	<u>Competition</u> <u>Export</u> <u>Quit</u>
Image directory: C:\ Image C:\ Single file: 20004005 FTP upload FTP parameter F7	
Copy: save names only	
Provide for these clubs automatically: 0499001 ; 0497737and display to these clubs:	
C Activate blocking of local Intranet upload	

Enter the desired target directory and make a note of the tournament number (*single file*). Click on *Output* and start the tournament export. You now have the option of sending the file as an e-mail attachment, for example.

Export for the ASG Order of Merit

PC CADDIE must be up to date. This is the most important requirement for the export to work. Please check whether a new programme version is available and install the update update if necessary.

Then export the tournament as described above and enter the destination as follows:

Export competition:	PC CADDIE Cup, 25.03.20	×
Us of this con the in Computed <u>r</u> ound:	e this function to save all data npetition on a data medium to transfer nformation to another computer. 1. Round – I and all previous rounds	<u>Competition</u> <u>Export</u> <u>Quit</u>
