

Hole competition

For match play, the results can be entered in all variants and transmitted to the intranet, whether as + for „hole won“ or „-“ for hole lost or as strokes.

Explanations

In match play, the players play against each other individually (or in pairs in four-hole matches). The result is usually only determined by who won or lost a hole, or whether the hole ended in a draw.

In net hole play, there are two variants for the distribution of the handicap strokes:

- According to the DGV recommendation since 2016, handicap strokes are better to be given on the holes whose handicap distribution key lies between the playing handicap of the better player and that of the weaker player, as this is fairer. This variant has been the default in PC CADDIE ever since.
- Until 2015, in PC CADDIE the difference in the playing handicap of the opponents was given in ascending order according to the handicap distribution, starting with the most difficult hole. If you want this old distribution, deactivate the new default setting: ***for distribution to the difference holes***.

Net hole play single

General tournament settings

[Create tournaments general](#)

In the basic settings of the tournament, set the game type to „Singles“ and the „Counting method“ to „Match play“. Very often an HCP factor of 3/4 is used here. Please note your invitation to tender!

Scorecard - distribution of the difference holes

According to the DGV, the handicap strokes are better given on the holes (=difference holes) whose handicap distribution key lies between the course handicap of the better player and that of the weaker player. This is fairer for a hole competition.

Meaning: As the players are playing against each other, all strokes are removed from the full course handicap that both players would receive with the full handicap (or 3/4). Only the strokes on the so-called „difference holes“ remain; the holes on which only the weaker player (with full or 3/4 handicap) would receive additional strokes.

Example With handicap factor 3/4:

First the difference of the full course handicap of the partners is determined, then 3/4 of it is calculated and rounded, then the handicap of the better player with HCP factor 3/4 is checked (in our example this would be handicap 17), therefore the handicap lines on the scorecard start with handicap 18, then 1, 2, 3, and 4.

Entering results

You have several options for entering results, and you can also mix them within a tournament, depending on how the players have filled the scorecards of the hole betting game! You will always see the respective hole competition opponent in the display when you enter the results.

Variant 1 - Total result

As soon as only 1 result, e.g. 2up, is entered for gross, the net field fills automatically (which is not needed). In addition, the opponent's result fields are automatically filled analogue with 2down.

	Felix (adfe)	PC CADDIE Gast D	46,0P /0.0
	etra (tupe)	Migros GolfCard	36,0

Ergebnis-Typ:

Brutto:

Netto:

Hier können Sie direkt die Endergebnisse des Matchplays eingeben. Dabei werden die folgenden Formate erkannt:

even oder geteilt = ausgeglichen
 2up oder 2auf = Ergebnis beim Sieger
 2down oder 2unter = Ergebnis beim Verlierer
 3&1 = Ergebnis mit vorzeitigem Ende
 3down&1 = Ergebnis mit vorzeitigem Ende aus Verlierersicht
 given oder gegeben
 Hinter dem Ergebnis kann nach Komma noch eine Stechinformation folgen.

With this variant, too, the opponent's results are filled analogously, if you have entered a +, the opponent gets a minus on the same hole (only one player can win the hole 😊). You will also see the opponent's score in the par column and the partner's handicap on the respective hole in the „W“ column (if it is shown as a +, the opponent has the shot ahead):

Variante 3 - Entering numbers

With this input variant, the opponent's result is also entered. PC CADDIE then determines who has won or lost the hole from the opponents' numbers and scores. If the result of the 2nd player of the opponents is entered, the par of the hole and the result of the opponent are shown in the „Par“ column: 4/6 (par4/played6)

SMS for pairings

If you want to send SMS messages to the players about the pairings, be creative. It makes little sense to switch off the information about the (provisional) start time, because at the next hole competition CLUB may play against CLUB and you need the start time in the SMS.

If you keep the text short (the example is almost too long, because the names of the two players in the pairing should still be given), it could go like this:

Turnierliste als SMS senden

Bitte geben Sie einen Text ein, der der SMS vorangestellt wird:

Matchplay PCCADDIE: Info zur ausgelosten Paarung (Startzeit kann jeder selber besprechen):

Den obigen Text bei neuen Sendungen stets mit diesen Informationen vorschlagen:

Absender-Information

Turniername

Bitte beachten Sie, dass eine SMS nur 160 Zeichen haben kann und bei zu langem Text die Liste der Flightpartner gekürzt werden muss.

SMS für TURNIER-ABSAGE versenden

Damit werden die SMS ohne Zeiten und Partner erzeugt. Die genaue Absage-Information sollten Sie oben im Text eingeben

Versandtermin (leer = sofort):

Datum: . Uhrzeit: :

Sendeliste (bestehende SMS senden) **F7**

Enter 1st round results

Read under: [Enter hole competition results](#)

Whenever you have entered results, transfer the competition to your homepage so that the tree fills up bit by bit.

Start of the following rounds

As soon as all the results of the 1st round have been entered, you can use the **cut function** to load the matchplay winners from the 1st round into the 2nd round.

If you want to create a start list for the 2nd round, simply leave the order of the players as they were loaded, which corresponds to the „tree display“. If you no longer wish to create a start list for the subsequent rounds, this is also possible. It is sufficient if you enter the results correctly. The pairs that have to play against each other are determined by the start list of the 1st round and the results entered.

For the online display, you must create a start list for each round (then also transfer with Internet + okay).

Hole betting game VIERBALL and FOUR

The evaluation is not supported for hole competition games with 2 individual results per pair of players! Here you can only print scorecards !!! This applies to the four-ball (and the aggregate).

The classic foursome, foursome selection drive and capman foursome can be analysed as a hole competition. as there is only 1 result for each player pairing!

A ***tree representation*** is currently not possible with foursomes (all forms of play) (as of March 2024)
