

# Edit product types

You can edit product groups in the following window, available under **Accounts/Fees/Edit and change group of articles**:

1. You can create a new product category after pressing **New** (F9).
2. 😊 You can modify and change the categories by pressing **Edit** (F7).
3. ⚠️ You should **Delete** a group only when no articles are part of it. When you delete a product category that is still used, the category's abbreviation is saved in the article's description.
4. The **Exchange article groups within the articles** opens the following window; confirm your settings with **OK**.
