

Delete account entries

The **Exit/Fast Backup** is particularly important in this case, as deleting accounts is an operation that should be handled with caution. It is better to consult the PC CADDIE Support if you have doubts.

Delete according to contribution allocation

If you made mistakes regarding the automatic contribution rules, you can usually correct them with the automatic assignment of contribution by starting the automatic assignment with exactly the same posting date.

HINT: If you have started the automatic contribution assignment with different dates (for example once at 20th of January, 2011 and once at 25th of January, 2011, you should consider deleting the accounts entries.

This is how an example account looks like:

Information	Date	Time	S	Net	Brutto	OK
aact Annual fee active	20.01.11		A	250,00	250,00	
aact Annual fee active	25.01.11		A	250,00	250,00	

Summary values at the bottom of the window:

0.00	0.00
0.00	0.00
500.00	500.00

Are you sure you made a [Fast backup](#)?

Then you can delete the entries from the 25th of January, 2011 using the menu entry **Accounts/Year End/Delete Accounts**. Click on **Delete** and confirm all the warning messages:
