All partners

This option is best used when ordering the partners alphabetically. The list will show all flight partners in one line. For example, if a player is asking for his tee time, he will receive all the additional information.

Tee time-following round

The list is printed with two tee times: the current one and for the following round. This list might be helpful if the flights will be the same in both rounds, and just the times are different.

Customization information - layout

| 🔽 Info: | Individual Information 💌 | Layout |
|---------|--------------------------|--------|
|---------|--------------------------|--------|

The *Layout* button from the right-hand side can be used to create your own starting list - similar with the persons lists: List of persons.

The following examples explain everything from tea color to payment info.

Note that PC CADDIE uses two different list formats, depending on whether you chose "Start Order" in **Order**: one is for the list with the tee time order and the other one for the other orders. Check that the correct layout has been selected before starting the printing process.

Customization: Start list with TEAM NAME

The module "Team rating" is a prerequisite for building the teams! If you have it and you want to print team names with the start list, use the following FIELDS:
